

FTI-MX01

**25 subclasses,
227K+ species,
one hunter**

FLYTRICK 

**THE MOST ADVANCED TECHNOLOGY
FOR HUNTING FLYING INSECTS**

Over 10 years LED life*

Lowest energy consumption in its class (1/5)**

About 4 times larger effective area.***

1 year 100% replacement + 1 year fully repair warranty.

This patented technology was developed by Turkish entomologists, engineers and designers and it is the first one in its class.

* This is calculated by approx. 10 hours continuous work.

** This is compared with 40W UV fluorescent models.

*** That depends on ambient light, it can always achieve a larger effective area by its 12 times stronger LED technology.

220V AC inlet / 8W power consumption

48.5 cm x 35 cm x 30 cm

Compatible with 25 cm x 45 cm sticky papers

3 custom designed wide spectrum UVA/UVB LEDs

Effective on 25 subclasses, over 227K species

Washable nanotech UV reflective screen.

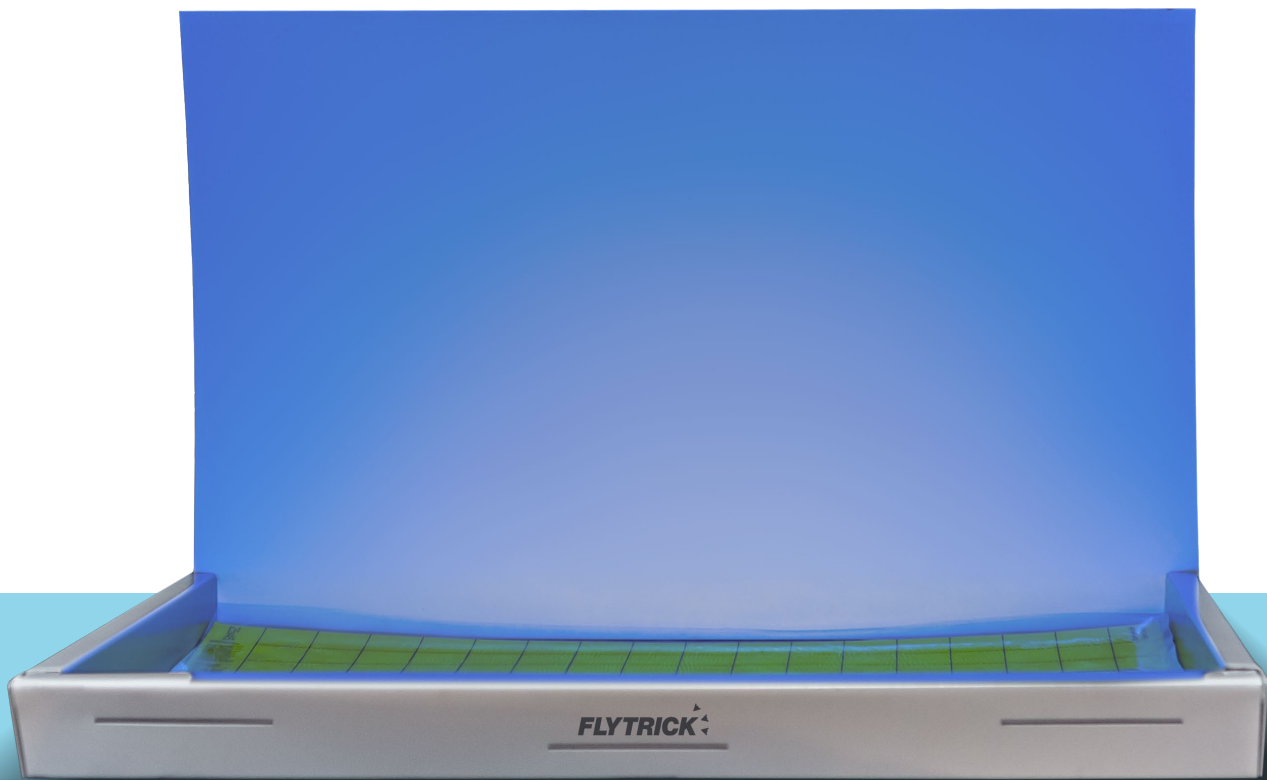

Elektrostatic paint or INOX options.

1+1 years warranty period.

%100 developed in Turkey.
